

ALBIN DAVID C

AI FULL-STACK DEVELOPER & SOFTWARE ENGINEER

Velur, Thrissur, Kerala, India | +91 9946799434 | albindavidc@gmail.com
<https://github.com/albindavidc> | <https://www.linkedin.com/in/albindavidc>
<https://www.albindavidc.com/> | <https://leetcode.com/u/albindavidc/>

PROFESSIONAL SUMMARY

AI-focused full-stack software engineer experienced in building maintainable web applications and intelligent product workflows across Angular, TypeScript, Node.js, NestJS, Express.js, PostgreSQL, MongoDB, Redis, and modern cloud tooling. Experienced with REST APIs, JWT authentication, CQRS, Clean Architecture, feature-based frontend architecture, real-time systems, ORM/ODM patterns, AI/LLM application workflows, and production deployment. Combines software engineering with UX/UI design to turn product requirements into responsive, scalable, user-focused applications.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL

Frontend: Angular 22, Angular, RxJS, NgRx, Tailwind CSS 4, Angular Material, SCSS, Bootstrap, Feature-based architecture, Angular CLI, ECharts, DHTMLX Gantt, FilePond, Google Maps, Stripe

Backend: Node.js, NestJS 11, Express.js, RESTful APIs, Socket.io, JWT, Passport, CQRS, Clean Architecture

AI/LLM: Google Gemini, LangChain, LangGraph, AI-assisted application workflows, prompt engineering, agentic workflows

Data: PostgreSQL, MongoDB, Redis, Prisma, TypeORM, Mongoose, MongoDB Node Driver

Security & Testing: Argon2, Passport-JWT, Zod, authentication, authorization, OTP/email workflows, Vitest, ESLint, Angular ESLint, TypeScript ESLint, Prettier

Cloud & DevOps: AWS, S3, Docker, Vercel, Netlify, GCP, Nginx, PM2, Git, GitHub, pnpm

Design & Tools: Figma, Framer, Canva, Adobe XD, Lucidchart, Notion, VS Code, Antigravity, Postman

PROFESSIONAL EXPERIENCE

Freelancer – WordPress Developer

Remote | Sep 2021 – Present

- Developed and deployed three major web projects, including live production sites and an e-commerce application; migrated SitePad builds to WordPress.
- Managed Google Workspace for Education and supported Canva for Education and Figma for Education administration.

DC Graphics – Manager / Senior Graphics Designer

Thrissur, Kerala | Aug 2023 – May 2024

- Supported sales, technical demonstrations, setup, and client operations for professional printing and office equipment.
- Trained new staff on printer configuration and intermediate graphics-design workflows, strengthening technical communication and team enablement.

HelpyMoto – UX Designer Intern

Remote | Nov 2022 – Mar 2023

- Designed wireframes and prototypes for the payment flow of a vehicle roadside-assistance application, including multi-gateway payment requirements.

SELECTED SOFTWARE PROJECTS

Nirman AI – Construction & Project Management Platform

Live: <https://nirman.albindavidc.com/> | Client: <https://github.com/albindavidc/nirman-client> | Server: <https://github.com/albindavidc/nirman-server>

Stack: Angular, NgRx, Angular Material, SCSS, ECharts, DHTMLX Gantt, FilePond, Google Maps, Stripe, NestJS, Prisma, PostgreSQL, Redis, Socket.io, Clean Architecture, Docker, AWS S3, pnpm

- Designed a modular full-stack platform for construction and project workflows using feature-based frontend architecture and scalable backend services.
- Integrated project planning, task workflows, reporting/analytics, procurement, real-time communication, cloud storage, maps, and payment-oriented product capabilities.
- Extended the platform with AI-oriented workflows using modern LLM application patterns and backend orchestration.

Vidya AI – AI-Driven Educational Platform

Live: <https://vidya.albindavidc.com/> | Client: <https://github.com/albindavidc/vidya-ai> | Server: <https://github.com/albindavidc/vidya-server>

Stack: Angular 22, TypeScript 6, RxJS, Tailwind CSS 4, NestJS 11, TypeORM, MongoDB, JWT, Passport, Argon2, CQRS, Zod, Brevo, Vitest, LangChain/
LangGraph-oriented AI workflows

- Built an AI-driven educational platform focused on personalized learning and smart study workflows.
- Implemented Angular frontend tooling and a modular NestJS backend with Users, Articles, Auth, and Mail domains, MongoDB persistence, CQRS handlers, request logging, and OTP email delivery.
- Applied validation, testing, authentication, and modular architecture patterns for maintainability and production readiness.

Nexus AI – Fitness Social Platform

Live: <https://nexus.albindavidc.com/> | Client: <https://github.com/albindavidc/nexus-ai> | Server: <https://github.com/albindavidc/nexus-server>

Stack: Angular, Node.js, Express.js, Mongoose, MongoDB, Socket.io, AWS, S3

- Built a real-time fitness social platform combining workout-partner discovery, groups, and AI-assisted coaching workflows.
- Implemented real-time and cloud-backed application features across the frontend and backend.

Unbound – Customizable E-commerce Platform

Live: <https://unbound.albindavidc.com/> | Repo: <https://github.com/albindavidc/unbound>

Stack: EJS, Node.js, Express.js, MVC, OAuth, GCP, Nginx, PM2, Git, DNS, SSL/TLS

- Developed and deployed a customizable e-commerce application using a Node/Express MVC stack with MongoDB, OAuth, and production infrastructure.

Personal Projects (AI Studio)

Stack: React, Angular AI Studio, Vercel, Netlify, VS Code, Antigravity

- Built AI-oriented and portfolio applications including Pixel Mastery, Arogya, Memora, Icon Space, Chrono Mind, Udyama, and other focused web products.
- Used AI-assisted development workflows alongside VS Code and Antigravity to accelerate prototyping, implementation, and iteration.

EDUCATION & CERTIFICATIONS

- **Mechatronics (MR) Engineering** – APJ Abdul Kalam Technological University, 2023
- **MEAN Stack Development** – Brototype, 2025 | **User Experience (UX) Design** – Google, 2022 | **Desktop Publishing (DTP)** – Kerala State Rutronix, 2015
- **Certifications:** Foundation of HTML, CSS & JavaScript (Duke University), TCS ION Career Edge, Angular Certificate, Google Digital Marketing
- **Languages:** English (Fluent), Malayalam (Fluent), Hindi (Read & Write)
